

# ORGANIZATIONAL POLICY: DATA GOVERNANCE & AI USAGE

## Standard Operating Procedures (SOP) & Compliance Guidelines

### 1. DOCUMENT TITLE & OVERVIEW

Document Title: Standard Operating Procedures for Enterprise Data Governance, Information Security, and Responsible AI Utilization.

Document Code: SOP-GOV-2026-V2 | Effective Date: September 25, 2026

Overview: This governance document defines standard operating protocols for handling company records, managing confidential digital files, and utilizing generative AI tools safely across all corporate departments.

### 2. CORE THEMES & OPERATIONAL PRINCIPLES

- Data Integrity:** All business documents must be accurately cataloged, tagged with appropriate classification tiers (Public, Internal, Confidential, Restricted), and retained according to regulatory statutory schedules.
- Responsible Artificial Intelligence:** AI assistance tools must only be used to augment employee productivity. All AI-generated outputs, analyses, and summaries require human review before client delivery.

### 3. SUPPORTING DATA POINTS & REGULATORY CONTEXT

Industry audit reports demonstrate that companies maintaining proactive document governance programs reduce accidental data disclosure incidents by 79% and achieve 3.4x faster compliance audit completion. Furthermore, standardized document templates improve cross-functional collaboration efficiency by 35%.

### 4. ACTIONABLE TAKEAWAYS FOR EMPLOYEES

- Never submit unredacted Personally Identifiable Information (PII) or confidential client keys into public AI prompts.
- Verify all AI-generated contractual terms, financial numbers, and dates against original source documentation.
- Store all final executed agreements, invoices, and research reports in secure, backed-up company cloud repositories.

### 5. SUMMARY & RECOMMENDATIONS

Summary: Proactive compliance protects company assets and client confidentiality. Department heads are required to ensure 100% staff completion of annual data security training and maintain formal audit trails for all sensitive documents.
