

BUSINESS PROPOSAL: ENTERPRISE WORKFLOW AUTOMATION

AI-Powered Productivity Platform Modernization

1. EXECUTIVE SUMMARY

This business proposal outlines our strategic partnership to deploy TaskPanda AI across your enterprise organization. By automating repetitive document reviews, team sprint scheduling, and compliance verification, our solution projects a 40% reduction in operational cycle times within the first quarter of deployment.

2. PROBLEM STATEMENT & PROPOSED SOLUTION

Modern engineering teams spend over 14 hours per week searching through unstructured PDF specifications, project reports, and contract amendments. Our proposed solution integrates multi-agent AI verification with real-time Firebase collaboration, turning static documents into actionable tasks and interactive checklists.

3. SCOPE OF WORK & KEY DELIVERABLES

Phase 1: Architecture audit & security clearance (Weeks 1-3). Deliverable: Approved threat model.

Phase 2: Core PDF Intelligence Manager & AI assistant integration (Weeks 4-7). Deliverable: Working beta deployment.

Phase 3: Team workspaces, gamified incentives & enterprise SSO rollout (Weeks 8-12). Deliverable: Full production release.

4. PROJECT BUDGET & PRICING BREAKDOWN

The total project budget is \$45,000 USD, structured across three milestone payments:

- Milestone 1 (Discovery & Architecture): \$15,000
- Milestone 2 (Core Development & AI Engine): \$20,000
- Milestone 3 (Enterprise Deployment & Training): \$10,000

Ongoing monthly cloud hosting and SLA support: \$1,200/month.

5. TIMELINE & MILESTONES

Project kickoff commences October 1, 2026. Weekly sprint reviews and progress demos will ensure transparent deliverables. Final user acceptance testing (UAT) and company-wide onboarding are scheduled for completion by December 18, 2026.
